- Miscellaneous

A Day in the Life of Ozone

Early Morning

Late Morning

Mid Afternoon

Late Afternoon

The Spare the Air Program

- Voluntary intermittent program to reduce emissions on high ozone days.
- On average 20 - 25 day per year.
- Begun in 1991.
- Sacramento and San Joaquin Valley air districts have similar Spare the Air programs.

What You Can Do on a Spare the Air Day

Reduce your driving.

**Postpone using gasoline powered
lawn and garden equipment.**

Don't use consumer products that pollute.

Don't use gasoline powered boats.

Conserve energy.

Why is it important to reduce air pollution?

It's a public health issue.

It's a business productivity issue.

It's a quality of life issue.

Aspects of the Spare the Air Program
